NEWS OF INTEREST TO FARMERS — SOIL CONSERVATION — FORESTRY — LIVESTOCK

NEWS OF COUNTY FARM BUREAUS

By Byron Dyer

Every effort possible will be made during the next few months to find an answer to some of the major agricultural problems that face the farmer today. Congressmen in the Middle Ground Farm Bureau Thursday night.

The situation at the present is serious, with the cost of production going up all the while and the farm income gradually going down. There is an answer to the problem, surely, Congressman Preston declared, but right now no one seems to know it. Frankly, it looks like the present national administration is interested in helping everyone but the farmer. Mr. Preston presented numerous questions from the United States Chamber of Commerce, the department of Ag-

riculture and others pointing out that everything was raining smoothly and at a normal price level. He then cited numerous figures showing the share of the income from farm produce farmers were receiving and what they were getting as well as what they get out of numerous products. There is only three cents worth of corn in a 22 cent box of corn flakes, 30 cents worth of cotton in a \$2.95 shirt, five cents worth of oats in 18 and one half cent box of rolled oats, all of which simply add up to the farmer getting 14 cents out of a dollar's worth of produce, the other groups gets 86 cents. It takes 30 cents of this 14 cents to produce the dollars worth of produce. This leaves the farmer only 14 cents to live on.

Mr. Preston praised the CIO for coming to the farmers aid, in helping to get these facts before Congress and peanuts back on the basic commodity list. This is something new for the labor organizations to help fight for the farmer, he pointed out.

Farm Bureau has got to get stronger in the south. Mr. Preston pointed out that had it not been for the efforts of the Farm Bureau in the south and CIO, basic commodities would have gone off the commodity list for sure. Farm Bureau in some sections of this country does not represent the farmer, he said. It is over the more reason for farmers here to build themselves a stronger organization.

The Bulloch four entertained the group gathered that rainy night for the Family Night meeting for some 30 minutes with favorite songs. Otis and Charlie Joe Hollingsworth, Bernard Banks, Carl Bishop and Charles Deal alternated the quartette for awhile and then brought in the Congressman for their meeting Friday night. Rain started falling in a down pour fashion about sundown and continued all through the meeting. About 28 members did get to the meeting.

The need for sending in soil samples for a chemical analysis and methods of procuring them were discussed.

Frederick Dyer gave a short review of his work in the Coast of Alabama National Forest this summer on blaster rust control. This area is located in Idaho, a part of the country explored by Lewis and Clark.

Frederick stated that his camp was some 60 miles back in the Rocky Mountains from the nearest town, that supplies were brought in to them every Tuesday, as well as mail. The group lived in tents. The temperatures would go as high as 90 degrees in the day and declined to around 25 degrees every night. They lived some 3,000 feet above sea level and worked around 4,000 feet above. They could see the states of Washington and Montana as well as Canada from where they worked. The bears tried to steal their food every night, until they put up an electric fence around the tent used to cook in. There were a lot of elk and deer in the area, as well as other game. But, it still nice to be back in Bulloch county civilization, he stated.

By exercising extreme care, when working in barnyards, not to drop and leave nails, pieces of wire and other sharp pieces of metal that could be picked up and eaten by cattle, farmers will do a long way toward reducing the number of "hardware disease" cases.

SOIL AND WATER CONSERVATION

By E. T. ("Red") Mullis

Recent rains have been bad on cotton but good on ponds which have been low for some time. Some ponds of cooperators of the Ogeechee River Soil Conservation District have been built last year have never gotten enough water to support fish. The body of the earth has been dry for some time now and will have to be replenished with water before some ponds on small watersheds will fill up.

On the other hand some ponds on large watersheds have been Julian Tullman of Statesboro, and Mr. Charlie Holland of Register, have a jointly owned pond below Register on a large watershed and they are having some difficulty getting rid of the surplus water. They have a large well and two roundabouts, which are adequate if properly constructed and sited. Their main trouble is gullying out the roundabouts before getting a joint venture with the Register on a large watershed and they are having some difficulty getting rid of the surplus water.

The Bulloch County Unit of the Ogeechee River Soil Conservation District has 2 coastal marsh grass planters in the county. One is at the County Soil Conservation Service office and the whereabouts of the other is unknown at the present time. We have lost track of one of the planters and would appreciate it if anyone who knows where it is would notify the local office.

By exercising extreme care, when working in barnyards, not to drop and leave nails, pieces of wire and other sharp pieces of metal that could be picked up and eaten by cattle, farmers will do a long way toward reducing the number of "hardware disease" cases.

Danger Period For Blue Comb Disease

Blue Comb disease in poultry

Blue Comb disease in poultry will probably be increasing during the month of August, the American Veterinary Medical Association reports today.

"In chickens the disease usually occurs in heavy egg producing pullets but may occur just before birds come into production. The condition has also occurred in younger birds, but less frequently," AVMA officials said.

The disease is characterized by depression, lack of appetite, and whitish, watery droppings. Darkening or blue discoloring of comb and wattles, from which the disease gets its name is another common symptom. Death often occurs suddenly, and losses which are generally low, around 5 per cent, may reach 50 per cent in some flocks.

The course of the disease extends over a one to two-week period and terminates in a high percentage of apparent recoveries. Egg production drops off very suddenly and tends to lag for several weeks, even after the birds appear to have recovered.

"There are few diseases that require an accurate veterinary diagnosis more than Blue Comb. Certainly symptoms of Blue Comb are the same as Fowl Cholera and Fowl Typhoid, and for this reason a trained person must check the possibilities of other causative agents," the AVMA reports.

A new test is being hailed as an important step in the control of chronic respiratory disease (CRD), a common ailment in poultry, according to a report from the American Veterinary Medical Association.

Some poultry health authorities are convinced that this new test, a "freeze-agglutination" test, will make it possible some day for the successful poultryman to ask for birds that could be picked up and eaten by cattle, farmers will do a long way toward reducing the number of "hardware disease" cases.

Frederick stated that his camp was some 60 miles back in the Rocky Mountains from the nearest town, that supplies were brought in to them every Tuesday, as well as mail. The group lived in tents. Avoid Fattening Ration For Heifers

Dairy heifers that become too fat prior to breeding age appear to suffer from impaired udder development and subsequent milk production, according to a report in one of the recent veterinary journals.

The American Veterinary Medical Association reports results obtained at the University of Tennessee experiment station where identical twin heifers were studied.

One heifer of each pair was fed a fattening ration while the other calves received a growth producing ration. At the age of 12 months the overly fat heifers weighed 15 per cent more than their twins.

In each of two lactations, the heifers which had been fattened produced much less milk than their non-fattened twins.

The conclusion drawn is that while a well balanced ration is needed for good growth and development, a fattening ration is detrimental to normal udder development, the AVMA says. When unusual breeding problems develop, it's best to get veterinary advice.

An estimated total of 319 million head of hogs were reported in the world in 1954. This is the highest on record and six per cent more than in 1953.

Mr. and Mrs. Leoland Holmuth of Pennville, W. Va., were guests Sunday night and Monday of Mr. and Mrs. Hubert Hodges.

VETS MAY NOW REPLACE INS.

Director Pete Wheeler Releases Information To Korean Veterans

Pete Wheeler, Director of the State Department of Veterans Service, stated recently that veterans of the Korean War who lost their term United States Government of National Service Life Insurance, because their policies expired within 120 days after discharge, may now apply for replacement of that term insurance under a new law, Public Law 194, 84th Congress, which was approved last July 29th.

Under the new law, veterans whose term insurance expired after April 25, 1951, either while they are in active service or within 120 days after discharge may now replace such insurance within 120 days after July 29, 1955, whichever is later. The veteran must meet good health requirements and pay the premium at their attained age in order to qualify.

Wheeler pointed out that previously, only those term policies that expired while the veteran was in active service after April 25, 1951, could be replaced. The new law grants another opportunity for replacement to those veterans whose term policies expired while they were in active service after April 25, 1951, but who failed to apply for replacement within 120 days after discharge. Those veterans now have 120 days after July 29, 1955 in which to apply.

Wheeler invited all interested veterans to contact the local Veterans Service Office for further details. The local office is located at Statesboro, Georgia, and the manager is Benjamin B. Hodges.

Mr. and Mrs. H. V. Sheffield of Albany, Georgia, Mr. and Mrs. Red Blalock and sons of Savannah, Mr. and Mrs. Willard Hensley and children visited during the week-end with Mr. and Mrs. Shafter Futch.

Hot Weather Relief!

Weather too hot for play? Then it's time to gather the young fry out from under a tree and give them the making for ice cream cones. Store in bowls, covered with foil, in freezer or freezer compartment, until ready to use. 2) Fill several small bowls with "apples" lined above... with reserves at hand! 3) Set up serving table with a large bowl for holding empty cones. If you have a serving basket for ice cream cones, it makes a perfect holder. Put "apples" in a row.

Ice Cream Cones Shredded coconut Chopped nuts Ready-to-eat cereals

In advance: 1) With an ice cream scoop, form balls of medium-hard ice cream. Store in bowls, covered with foil, in freezer or freezer compartment, until ready to use. 2) Fill several small bowls with "apples" lined above... with reserves at hand! 3) Set up serving table with a large bowl for holding empty cones. If you have a serving basket for ice cream cones, it makes a perfect holder. Put "apples" in a row.

Thirty minutes before serving: 1) Remove frozen ice cream balls from freezer and leave, covered, at room temperature... take out only enough for one serving for each guest. 2) About thirty minutes before it's time for seconds, remove another bowl of ice cream balls from freezer. At serving time: 1) Arrange ice cream balls in chilled bowl or platter. Let children serve themselves at once.

Mr. and Mrs. H. V. Sheffield of Albany, Georgia, Mr. and Mrs. Red Blalock and sons of Savannah, Mr. and Mrs. Willard Hensley and children visited during the week-end with Mr. and Mrs. Shafter Futch.

Portal News

Mr. and Mrs. Gene Humphrey and daughters, Gene and June of Warner-Robins and Mr. and Mrs. R. V. Humphrey of Metter were visitors in Portal Sunday.

Milton T. Hathcock MRS. has returned to New York, where he is serving aboard the U.S.S. Stormes after spending ten days with relatives here. He motored here with Richard Bayham who visited his parents in New Orleans, La.

Mr. and Mrs. Rufus Hendrix of Warner-Robins, Ga., and Hendrix's brother, Mr. Lester Donaldson and family of Walterboro, S. C. Sunday.

Mrs. W. E. Odom spent several days last week at Augusta visiting relatives.

Mr. and Mrs. Hewett Roberts were over night guests of Mr. and Mrs. Bill Cody of Griffin Sunday. They spent Monday in Atlanta and attended the auto races.

Mrs. Bertha Dutton returned home with Mrs. Lena Hendrix of Warner-Robins, Ga., and will remain over for ten day visit.

Mr. and Mrs. Walter Woods Jr. and family of Charleston, S. C. returned the week end guests of his parents, Mr. and Mrs. W. H. Woods.

Mr. Herbert Aaron, Mrs. Marie Mullins of Savannah, are attending the Florida State Bridge Tournament, at West Palm Beach. An account of four days, this partnership has enjoyed wonderful success all this year.

Mr. and Mrs. Jimmie Youmans and family of Swainsboro, were week end guests of Mrs. Dean Nichols, Sr.

On Friday night the Hathcock Campbell wedding rehearsal nuptials took place at Portal Baptist Church, after which refreshments were served on the church lawn.

The guests were served assorted cookies, ribbon sandwiches and cake. The best man received Misses Maude, Lucille, Leila and Ruby and Lessie White were visiting in Augusta Saturday.

STILSON NEWS

Misses Leona Newman and Betty Harden of Fernandina Beach, Fla., spent the week end with their parents here.

Mr. and Mrs. George M. Kendrick have returned from Miami and Daytona Beach, Fla. They were accompanied by Mr. and Mrs. Perry Shuman and daughter of Savannah.

Mrs. S. A. Driggers and daughter, Sara Frances, have returned from Rome, where they were called on account of the death of Mrs. Drigger's brother, Donald Maynard. They were accompanied by Joel Driggers.

Mr. and Mrs. J. A. Shuman and daughters, Uldine and Mary Allison Shuman have moved into their beautiful brick home.

Homecoming Sept. 11 Homecoming at Immanuel Baptist Church will be held Sunday, Sept. 11. Rev. Geo. Akin from Savannah will be the guest speaker in the morning. At the noon hour a luncheon will be served on the church lawn. Dr. Jordan will be the speaker in the afternoon on "Family Altar." For the evening service, Evangelist Tom Bradley of Atlanta will bring the message. Everyone is invited to attend.

The Hagan reunion which was held Sunday at Dasher's was largely attended by relatives from Florida, Virginia, Georgia, Alabama, Atlanta, Fort Valley, Augusta, Swainsboro, Pembroke, Swainsboro, Statesboro, Pooler, Milledgeville, Savannah, and other places.

Usher-groomsmen were Sonny Penfield and Kenneth Bishop, who also lighted the candles. All the men of the wedding party were white boutonnieres.

Mrs. R. T. Hathcock, mother of the bride, was dressed in navy blue with a corsage of pink carnations.

Mrs. M. W. Campbell, the groom's mother chose an ensemble of black with a corsage of pink carnations.

The bride's grandmother, Mrs. Joe Ellis, the bride and groom, Mrs. M. W. Campbell and the lady attendants.

For going away the bride chose a lovely full suit of brown with matching accessories, with close fitting hat. She wore the orchid from her Bible. After a trip to Florida they will live in Savannah.

Georgians Are Observing Soil Conservation Week

D. B. Turner Dean Ga. Weekly Editors

following an illness of ten days. Affectionately known to his friends as "Uncle Dave," he was recognized as the dean of Georgia weekly newspapermen and one of the legendary figures of Georgia journalism.

In declining health, Mr. Turner retired in May, 1954, and had not been actively associated with the paper since that date.

Born in Clearwater, Fla., Mr. Turner began his career as a boy on his father's publication, the West Hillsboro Times as a lad of 13, and came to Statesboro in 1933 where he bought the Bulloch Times which he edited for 10 years.

WOMAN'S CLUB HOLDS MEETING

Mrs. H. DeWitt Aura,
Of Atlanta, Gives Very

Interesting Talk

The Statesboro Junior Woman's Club held it's first regular meeting of the 1955-56 year, September 8 at the Recreation Center, with the president, Mrs. H. P. Jones, Jr.

The program included a lovely musical selection by Mrs. Paul Franklin, Jr., and an orientation skit to acquaint the new members and also to refresh the old members with the organization and

The guest speaker was Mrs. H. DeWitt Aura, Atlanta, first vice president of the junior section of the Georgia Federation of Women's Clubs. She is the daughter of Mr. and Mrs. W. L. Olliff, Mrs. Max Lockwood and Mrs. Zack Smith.

men's Clubs. Mrs. Aura gave a very enthusiastic talk on junior woman's club work. She also offered many suggestions for improving the local club. The suggestions were very deeply appreciated.
